

Classic Haas Control (CHC) - Save an MDI Program

Scan code to get the latest version of this document

Translation Available

You can easily save a program from **MDI** to **MEMORY**.

First, make sure that the cursor is at the top of the program. Push **[HOME]** if the cursor is not at the top. Then, type a new program number (**Onnnnn**) that is not used in **MEMORY** and push **[ALTER]**. The control removes the program from **MDI** and saves it to **MEMORY** with the program number that you typed.
